

Business travel sustainability

Reporting, partnerships and technology to encourage responsible business travel.

With many companies focusing on their environmental impact, it's only natural for travel to be put under the spotlight. As your business travel partner, it's important we understand your commitment to sustainability and put reporting and features in place to help businesses know their carbon footprint and put actions into place.

Corporate Traveller is adjusting its reporting capabilities and making new partnerships to help companies reach those sustainability goals.

Reporting capability

Carbon and mileage reporting to measure your footprint and calculate carbon offsets.

- CO2 usage by month
- Top air CO2 routes
- Top hotel CO2 destinations
- Top car CO2 destinations

Partnerships

These partnerships enable clients to neutralise the carbon impact of their business travel and make a significant contribution to meeting their sustainability goals.

South Pole

- Contribute your carbon offset to a South Pole project that matters to you.
- Each quarter an emissions report is sent to South Pole.
- Certificate sent to detail your contribution.

TEM - Tasman Environmental Markets

- Feeds carbon emissions content into Savi via BlueHalo.
- Contribute your carbon offset to a TEM project that matters to you.

Savi functionality

- Travellers see carbon spend while booking flights. Hotel and car hire coming soon
- Hybrid cars available to book.
- Offset your carbon emissions through Savi by integrating with TEM's BlueHalo.

Sustainable supplier programs

- Better sourcing to empower conscious choices.
- We will work with you to select air, hotel and ground partners that meet your sustainability goals.
- Our supplier team have the contacts and insider knowledge to know the best fit for you.
